L'ANSE WARDEN ELECTRIC POWER, L'ANSE, BARAGA COUNTY, proposed Permit to Install application (PTI) for modifications to the existing boiler to increase the heat input to 324 MM Btu/hr for steam production; change the fuel from coal to wood waste, railroad ties, tire derived fuel, paper sludge, mill ash, fines and bark; and reduce the natural gas usage to less than 10 percent. The facility is located at 157 South Main Street, L'Anse, Michigan. Additionally, the revisions to the existing permit will require revisions to Renewable Operating Permit (ROP) No. MI-ROP-B4260-2004 (SRN B4260). This public comment period meets the public participation requirements for a future administrative amendment to the ROP. The responsible official for the source is Mike Reid, GM/COO, L'Anse Warden Electric Power, LLC, 33707 Power Plant Road, White Pine, Michigan 49971. Renewable Operating Permit and New Source Review public notice documents can be viewed on the Web at www.michigan.gov/deqair. Public comment will be taken through September 10, 2007. If requested by September 10, 2007, a hearing will be held September 26, 2007 (see September 26 listing in this calendar). Written comments should be sent to the Michigan Department of Environmental Quality, Air Quality Division, P.O. Box 30260, Lansing, Michigan 48909, to the attention of William Presson, Acting Permit Section Supervisor. Information Contact: **Randal Telesz**, Air Quality Division, 517-373-7089. Announcements

LAND AND WATER MANAGEMENT DIVISION

MINIMUM FLOW RELEASE FROM THE GREENWOOD RESERVOIR TO THE MIDDLE BRANCH ESCANABA RIVER REDUCED BECAUSE OF DROUGHT CONDITIONS. On July 23, 2007, the DEQ's, Land and Water Management Division (LWMD), authorized the temporary reduction of the minimum flow release to the Middle Branch Escanaba River. This action is in response to a petition from the Tilden Mining Company. The LWMD concurs that the watershed is experiencing a severe drought, and if weather conditions do not improve, there is a risk that the Greenwood Reservoir could reach critical levels next spring. The required minimum flow release from July 24, 2007, until September 14, 2007, will be 16 cfs. This authorization is pursuant to the Tilden Mining Company's Amended Order and Permit dated November 2, 1998, issued under the authority of Part 35, Use of Water in Mining Low-Grade Ore, of the Natural Resources and Environmental Protection Act, 1994 PA 451, as amended. SECOND ROUND OF APPLICATIONS (July 30-August 29, 2007) – TEMPORARY REIMBURSEMENT PROGRAM FOR LEAKING UNDERGROUND STORAGE TANK SITES. The Michigan Department of Environmental Quality (DEQ) Remediation and Redevelopment Division (RRD) will administer the second round of the Temporary Reimbursement Program (TRP) created

JULY 30 –
AUGUST 29, 2007

by the July 20, 2006, amendments to Part 215, Refined Petroleum Fund (RPF), of the Natural Resources and Environmental Protection Act, 1994 PA 451.

Overview: The first round of the TRP allocated approximately \$26 million for owners and operators who had approved claims under the former Michigan Underground Storage Tank Financial Assurance (MUSTFA)¹ Program or persons with a valid assignment of an approved MUSTFA claim for high risk sites, provided certain other eligibility criteria were met. The TRP assists owners and operators in paying for newly incurred cleanup costs associated with releases from their petroleum underground storage tank systems. Note that the program is only for new costs incurred after approval of the pre-certification application. Funds remain for a second round of applications that will be accepted on a first-come, first-served basis. Applicants who were approved in the first round for a given site cannot reapply for the same site. Applicants denied in the first round due to the site risk not being a class 1 or class 2 before May 9, 2005, may reapply if the latest information shows that the site is a class 1 or a class 2. The eligibility criteria for the second round are the same as those for the first round except that the site risk of class 1 or class 2 must be based on the most recent data.

Eligible persons shall receive reimbursement of 80 percent of each approved work invoice, up to a maximum total reimbursement amount of \$50,000.00 per approved site. The remaining 20 percent, up to a maximum of \$12,500, is considered a co-pay amount to be paid by the applicant. If funds still remain after all allocations, the remaining money will be allocated on a prorated basis among the approved first and second round applicants. To receive funding, the applicant must retain a Qualified Underground Storage Tank Consultant (QC) to perform the corrective actions in accordance with Part 213.²

Application Timeframe: The application form for the second round will be available on the Internet at 8:00 a.m. July 30, 2007, and will be accepted from July 30, 2007, through 5:00 p.m. August 29, 2007. Applications submitted outside this window will not be considered. Subscribers to the DEQ-RRD electronic mailing list (listserv) will also receive the application form when it is released.

For more information: Details on the program and the enabling legislation are available from the [RPF – Temporary Reimbursement Program link](#) on the RRD homepage at www.michigan.gov/deqrrd. In order to receive further updates on the TRP, the DEQ recommends that you subscribe to the Remediation and Redevelopment Division's electronic mailing list (listserv) by sending an Email message to rpf@michigan.gov.

WATER BUREAU

The Water Bureau is announcing a change in the public notice process for wastewater discharge permits issued pursuant to Part 31, Water Resources Protection, of the Natural Resources and Environmental Protection Act, 1994 PA 451, as amended (Act 451). These permits are commonly referred to as National Pollutant Discharge Elimination System (NPDES), Storm Water, and Groundwater permits. Public notice requirements for draft permits are identified in Rule 323.2117 of Act 451, and provide for three options, which include posting the public notice document in a post office or other public building near the wastewater discharge, posting the public notice document at the entrance of the applicant's premises, or publishing the notice in a local newspaper. The Water Bureau has historically relied on publishing the notice in a local newspaper. However, this practice has been found to have limited success in reaching the public. The Water Bureau has found that use of electronic means, such as publishing the notice on the Michigan Department of Environmental Quality Web site, has been more effective. In light of this, and the ability to conserve fiscal resources, the Water Bureau is changing the required public notice process to use the options other than publishing the notice in a local newspaper as a first preference. The Water Bureau will continue to work to effectively involve the public in this process, and will track the public participation process to ensure there is no decrease in public participation over time as a result of this change. Information Contact: **William Creal**, Water Bureau, 517-335-4114 or Email at crealw@michigan.gov.

Public Hearings and Meetings

Note: Persons with disabilities needing accommodations for effective participation in any of the meetings noted in this Calendar should call or write the appropriate meeting information contact listed below at least a week in advance to request mobility, visual, hearing, or other assistance.

EXTENSION OF DEADLINE FOR AIR POLLUTION COMMENT PERIOD ON CONSIDERATION OF CLEAN COAL TECHNOLOGY IN AIR USE PERMITTING:

The Michigan Department of Environmental Quality (DEQ) is taking public comments until September 14, 2007, on the DEQ's proposal to include clean coal technology as part of the air permitting process for new coal-fired electric generation in the state of Michigan. Specifically, consideration of Integrated Gasification Combined Cycle (IGCC) technology is proposed to be required as a part of the Best Available Control Technology (BACT) determination. The public comment period is to allow all interested parties the opportunity to comment on the DEQ's proposal. Both federal and state regulations require the use of BACT in the permitting of large air emissions sources, such as coal-fired power plants. The federal and state Prevention of Significant Deterioration regulations require that BACT be applied for each pollutant subject to the regulations. BACT is an emission limit based on the maximum degree of reduction for a pollutant and is determined on a case-by-case basis. It is important to note that the BACT limit cannot result in an impact above an air quality standard or any state or federal regulation. Additionally, BACT takes into consideration control options that are achievable through the application of available methods, "including fuel cleaning or treatment or innovative fuel combustion techniques." The DEQ is proposing that IGCC be considered along with other available methods for BACT review as part of the permitting process for coal-fired electric generating units. DEQ's fact sheet dated June 29, 2007, has been amended. The second bullet of the June 29, 2007, fact sheet which read, "Is consistent with policy and guidance provided by the U.S. Environmental

Protection Agency," has been removed. The new fact sheet dated July 26, 2007 is available for inspection at the following locations, or you may request a copy be mailed to you by calling 517-241-7468.

TENTATIVELY SCHEDULED PUBLIC HEARING REGARDING L'ANSE WARDEN ELECTRIC POWER, L'ANSE, BARAGA COUNTY, proposed Permit to Install application (PTI) for modifications to the existing boiler to increase the heat input to 324 MM Btu/hr for steam production; change the fuel from coal to wood waste, railroad ties, tire derived fuel, paper sludge, mill ash, fines and bark; and reduce the natural gas usage to less than 10 percent. The facility is located at 157 South Main Street, L'Anse, Michigan. Additionally, the revisions to the existing permit will require revisions to Renewable Operating Permit (ROP) No. MI-ROP-B4260-2004 (SRN B4260). This public comment period meets the public participation requirements for a future administrative amendment to the ROP. The responsible official for the source is Mike Reid, GM/COO, L'Anse Warden Electric Power, LLC, 33707 Power Plant Road, White Pine, Michigan 49971. Renewable Operating Permit and New Source Review public notice documents can be viewed on the Web at www.michigan.gov/deqair. If requested by September 10, 2007, a public hearing will be held in the Cafetorium of the C.J. Sullivan Elementary School, 201 North Fourth Street, L'Anse, Michigan. Those interested may contact the Air Quality Division at 517-373-7089 on September 11, 2007, to determine if a hearing was requested and will be held. Prior to the hearing, an informational session will be held from 6:30 p.m. until 7:00 p.m. in the Cafetorium of the C.J. Sullivan Elementary School, 201 North Fourth Street, L'Anse, Michigan. Staff will provide a brief introduction regarding the proposed project and will be available to answer questions. The public hearing will IMMEDIATELY FOLLOW. Information Contact: **Randal Telesz**, Air Quality Division, 517-373-7089.

MONTHLY AIR PERMIT APPLICATION WORKSHOP FOR FIRST-TIME APPLICANTS, CONSTITUTION HALL, LANSING, MICHIGAN. For most first-time applicants, completing the Permit to Install application is a daunting task. However, submitting a complete and timely application can be more manageable if you know what's expected. The Michigan Department of Environmental Quality is offering this workshop designed to give information on how to submit a complete permit application. Since this workshop is geared to first-time applicants, a significant portion of the session is devoted to your specific application. Air Quality Division permit engineers will be available to discuss your permit application with you one-on-one. To take full advantage of this time with the permit engineer, it is recommended you bring detailed information about your project with you to the session. This training is designed for first-time air permit applicants who need

TURNING REACH INTO AN OPPORTUNITY: A TRAINING ON IMPLEMENTING THE EUROPEAN UNION'S NEW REACH LEGISLATION, LANSING COMMUNITY COLLEGE WEST CAMPUS, LANSING, MICHIGAN. REACH – Registration, Evaluation, and Authorization of Chemicals – is the recently adopted overhaul of the chemicals management system in the European Union (EU). Entered into force June 1, 2007, REACH has important implications for U.S. firms exporting to European Member States. In order to help U.S. companies implement REACH and move beyond the law toward sustainable chemicals management, the Michigan Department of Environmental Quality and Lowell Center for Sustainable Production are presenting this training. Attend this one-day training to learn from one of the few REACH authors and other experts about what you need to know to comply with REACH, stay competitive, and advance more sustainable chemicals management in your firm. Any company which exports chemicals or chemical mixtures into the EU; competes in Europe, the U.S. or elsewhere with products meeting European standards; or exports finished products to Europe should attend this training. Attendees will receive a database of tools and resources to help them make informed decisions about chemicals alternatives. For complete conference agenda and registration information, go to www.chemicalspolicy.org/news.shtml. Registration fee is \$100 and includes continental breakfast, lunch, and conference materials. Pre-registration and pre-payment are required. Registration and Information Contact: **Yve Torrie**, Lowell Center for Sustainable Production, 978-934-3121.
